

24 July 2017

To Whom It May Concern:

This letter is provided in order to describe our experiences with Certified Business Services, Inc. (Centennial CO). Since 2012, we have had the pleasure of doing business with Bill and Carol Schuster, and their associates several times. In total, we have had circa four linear miles of compact shelving installed. We have had both large scope (ca. 12,000+ sq ft of warehouse, spread over two contracts) and smaller ornate/specialized units (board room-type wood finished; laboratory specific designs) provided by Certified.

The equipment has received daily and heavy use since and has performed exceptionally well. Three to five years on, it has not required even minor adjustment, and no repairs of any kind. Furthermore, it was a pleasure to work with Certified Business Services. They provided an exceptional product in a timely manner, and even better service.

I researched and interviewed numerous companies/providers and tested numerous products prior to selecting Certified and their Aurora products. I cannot recommend both highly enough. Indeed, prior to finding Certified, I purchased a small amount of compact shelving (ca. 250 sq ft) from another company and provider and am disappointed every time I see and use it.

If you would like to discuss any specific aspect of the services or products that Certified Business Services, Inc. provided, please do not hesitate to contact me directly. Email is best to arrange a telephone call (pcreasman@ltrr.arizona.edu).

Sincerely,

Pearce Paul Creasman, Ph.D.
Curator & Associate Professor
